

About the Surgical Technologist Program

The Surgical Technology Program is a comprehensive course of study that combines theory and clinical practice. The curriculum is designed to provide qualified individuals an opportunity to acquire the knowledge, attitudes and skills that will enable them to become safe and competent practitioners of Surgical Technology.

The program prepares students for positions in a number of health care facilities including hospitals, medical centers, and public and private surgical centers. The program includes a mandatory 600 hour Surgical Technology Externship that must be completed prior to graduation.
